

Price Monitor API

1.0.0 OAS 3.1

[/openapi.json](#)

Track product prices over time, query history, and set threshold alerts. Prices are polled automatically in the background via a configurable scheduler.

Products

GET /api/v1/products List Products

POST /api/v1/products Create Product

GET /api/v1/products/{product_id} Get Product

PATCH /api/v1/products/{product_id} Update Product

DELETE /api/v1/products/{product_id} Delete Product

Prices

POST /api/v1/products/{product_id}/snapshots Add Snapshot

GET /api/v1/products/{product_id}/snapshots Get Snapshots

Analytics
